

Microtec M197 Ducati Engine Control Unit

Brand: Microtec SRL

Product Code: M197

Availability: 7 Days

Weight: 1.00kg

Dimensions: 15.00cm x 10.00cm x 5.00cm

Price: \$1,925.00

Short Description

Injection and ignition control unit, specially designed for use on various Ducati models, replacing the original factory ECU. This is a complete kit with software, start up maps and the USB-CAN interface all included.

Description

The heart of the system consists of the Power PC MPC5534 by Freescale that with the high speed of calculation supported by a system clock of 80MHz, ensures great performance.

The high level of parameters configuration makes this module easily adaptable to different conditions of use.

The unit comes with two basic maps already preloaded and adapted to the model which will be used.

The following models are fully supported:

Hypermotard 1100

Monster 400

Monster 620

Monster 695

Monster 750

Monster 800
Monster 900
Monster 1000
Monster S2R 800
Monster S2R 1000
Monster S4
Monster S4R
Multistrada 620
Multistrada 1000
Multistrada 1100

Superclassic Sport 1000

Sport Touring ST2
Sport Touring ST3
Sport Touring ST4
Street Fighter 1098
Super Bike 749
Super Bike 848
Super Bike 998
Super Bike 999
Super Bike 1098
Super Bike 1098R
Super Bike 1198
Super Sport 620
Super Sport 750
Super Sport 800
Super Sport 900
Super Sport 1000

This unit is fully compatible with the original DUCATI dashbo-ard, and many other functions are available as options:

- High speed shift feature
- Auto mapping feature (adequate lambda sensor required)
- Drop switch
- Data acquisition on CAN line

By means of an included adapter, the unit can be connected to an USB port of a common Windows PC.

A 3D Windows application, is designed for customize and moni-tor all the system paramenters.

The external BOX is constituted by a black plastic cover and an aluminum back.

Four fixing points are provided to permit a simple installation on the original DUCATI support
