

# Bosch Motorsport EV14 Injector 630cc Standard Body

**Brand:** Bosch Motorsport  
**Product Code:** BOS0280158298  
**Availability:** 7 Days  
**Weight:** 0.10kg  
**Dimensions:** 5.00cm x 2.00cm x 2.00cm

**Price: \$126.50**

## Description

These injectors are the EV14S type from Bosch Motorsport. They are very popular for use in GM LS engines as well as Dodge SRT8, especially with a supercharger. They are also used as OEM fitment on Ford GT's and Shelby GT500 models.

EV 14 injection valves are the latest revision of the EV 6 injection valve technology. EV 14 xT are the latest revision of the EV 12. EV 14 is designed for a wide range of flow rates and spray patterns. Compact size and three standard versions simplify mounting in a variety of applications. These are genuine Bosch injectors with all of the correct markings.

This fuel injector has 4 center holes with 12 additional holes evenly-spaced and radiating around the outer edge of the nozzle plate. The flow pattern is split into two streams that fire at 45 degrees.

## OEM Equivalent

- Ford DR3Z-9F593-A
