Description

The EPT3100 Pressure Transducer is a high quality all stainless steel pressure transducer, intended for use in the measurement of gases and liquids compatible with stainless steel. The EPT3100 is suitable for automotive, industrial hydraulics, refrigeration off-road, construction and agricultural applications. The EPT3100 strain gauge sensing element coupled with the latest ASIC circuitry, assures excellent accuracy, choice of high level outputs and long stability, protected within a rugged, stainless steel housing. The EPT3100 high strength stainless steel construction contains non-silicone oil and no internal 'O' rings.

Measurements are available in gauge and absolute pressure, with ranges up to 4,000 Bar and are backed by a one-year warranty.
