Product Code: PXC7027
Weight: 0.50kg
Dimensions: 20.00cm x 20.00cm x
20.00cm

Price: \$175.00

Short Description

The range of Alloy neck universal filters is designed to fit all fuel injected engines using an intake pipe from the throttle body. Each lightweight cone features a spun aluminium neck attached to a high flow performance air filter element. Always fit the largest cone where possible to give the best performance gain. The spun neck has a built in ram pipe which forces the air into the engine, coupled with Pipercross high flow foam, it offers both the best air flow and a high level of engine protection.
