

Renault F4R Adjustable Cam Timing Tool

Brand: Cat Cams

Product Code: CAT925001

Availability: 7 Days

Weight: 1.00kg

Dimensions: 20.00cm x 10.00cm x 5.00cm

Price: \$605.00

Short Description

Due to the lack of cam bearing caps in the F4R design, this tool is the only way to install and degree cams. Also helps with cam belt replacement.

Description

The Renault F4R engine has proven to be one of Europe's hottest hot hatch engines powering successive Renaultsport models since 1999. The unique design feature of doing away with the cam bearing caps and incorporating them into the rocker cover saves a lot of weight, makes the engine more compact and the valve train stiffer. However, it makes replacing camshafts difficult and degreing them with any accuracy is almost impossible.
