Availability: In Stock
Weight: 8.00kg
Dimensions: 40.00cm x 30.00cm x
30.00cm

Price: \$2,080.10

Short Description

Perfect for classic rotary engine builds, these Heritage IDA downdraft throttle bodies combine classic looks with modern performance.

Description

The Jenvey Heritage IDA throttle body comes in TDA2Q-48 and TDA2Q-50 mm bore options. This is a single throttle body set up to suit 4 cylinder or rotary engines.

It includes a built in fuel rail, 350CC injectors, extension looms to bring the injector connector to the underside of the throttle body and a hidden internal throttle position sensor.

The Jenvey Heritage body is designed to fit the standard IDA carburettor flange.

Please note that it is not advised to run the Heritage Throttle Bodies with engines running boost. If you wish to run throttle bodies with a forced induction engine, we advice you to take a look at our standard throttle bodies.
